

JEREMIE LANDRY DJOKO

Phone: (+229) 46941609

Email:
jeremiedjoko@gmail.com

Address:
Zogbadje, Abomey-Calavi,
Benin

Portfolio :
jeremiedjoko.vercel.app

Languages

French: Fluent

English: Intermediate level

Personal Qualities

Honesty
Diligence
Punctuality
Eagerness to learn

Professional Summary

Information security graduate passionate about cybersecurity and AI, with a strong theoretical background complemented by hands-on projects in network and systems security. My final-year project at the Port Autonome de Cotonou involved designing a SIEM-based system for detecting and preventing covert-channel data exfiltration, enabling me to master tools such as Suricata, the ELK Stack, and Python scripting in real-world conditions. Motivated by innovation and teamwork, I am eager to develop new practical skills in information systems security, networking, and cybersecurity, and to apply my expertise in service of an organization.

Technical Skills

Programming Languages: Python, Bash, C++, HTML, CSS, PHP, SQL, React JS, Flask.

Cybersecurity Tools: Wireshark, Metasploit, BurpSuite, Nmap, Snort, Suricata, FortiGate, ELK Stack, SIEM.

Operating Systems & Tools: Linux, Windows, Git/GitHub, Firebase (FCM), Flutter.

Projects

Exfiltration Detection & Prevention System — Port Autonome de Cotonou

- Designed and prototyped a covert-channel exfiltration detection solution using Suricata IPS (NFQUEUE mode), custom rules, and ELK Stack for monitoring and correlation.
- Built a Linux-based router for traffic filtering and implemented an alert-to-action incident response workflow.
- Simulated exfiltration over DNS, HTTP, FTP, SMTP, ICMP and raw TCP using Python scripts.

AI Model — Data Exfiltration Detection

- Developed and trained a machine learning model to detect covert-channel data exfiltration (DNS/HTTP) with real-time alerting.
- Performed network data preprocessing, model training, accuracy evaluation, and integration with a monitoring workflow.

Mobile App — Alert Dashboard & Notifications (Flutter)

- Built a Flutter mobile prototype to receive real-time security alerts via Firebase Cloud Messaging (FCM).
- Implemented a dashboard displaying incident statistics (daily/weekly/monthly) with PDF export functionality.

Comotorage — Carpooling Web App (Flask)

- Developed a carpooling platform with Flask and MySQL allowing users to offer or search for rides with automatic matching (± 30 min tolerance).
- Built a responsive web interface with user and trip management, notifications, and ride tracking.

Professional Experience

IT Intern – Port Autonome de Cotonou (PAC) – 3 months

- Design of a covert-channel data exfiltration detection and prevention solution using Suricata IPS, ELK Stack, and Python-based simulation scripts.
- Analysis of cybersecurity incidents and human-error-related events.
- Preparation of meeting rooms, ensuring proper functioning of IT and audiovisual equipment.

IT Intern – Ministry of Agriculture, Livestock and Fisheries (MAEP) – 1 month

- Participation in the maintenance of IT systems, computers, and printers.
- Configuration of network equipment.
- Deployment of a logical FortiGate firewall to filter website access on the ministry's network.
- Preparation of meeting rooms, ensuring proper functioning of IT and audiovisual equipment.

Education

Bachelor's Degree in Computer Science – Information Security Option

Institut de Formation et de Recherche en Informatique (IFRI) – Universite d'Abomey-Calavi | march 2026

Key Modules: Security Audit, AAA Monitoring Server, Cryptography, Network Administration (Windows & Linux), Risk and Incident Management.

Thesis: Design of a covert-channel data exfiltration detection and response solution applied to the Port Autonome de Cotonou. Supervised by Ing. Herve AKAKPO and M. Jospy GOUDALO. IFRI/UAC, 2025.

Certifications & Online Training

- Introduction to Cybersecurity – Cisco Networking Academy
- Foundations of Certified Ethical Hacker (CEH) concepts
- CompTIA Security+ fundamentals
- Cisco Certified Network Associate (CCNA) – introductory concepts
- MikroTik Certified Network Associate (MTCNA) – introductory concepts
